

FABRICATION

MODS Connect Fabrication is a digital fabrication solution that support projects as well as operations and maintenance (O&M).

Fabrication generates a high volume of information. Using digital technology from the earliest possible stages with MODS Connect Fabrication eliminates the need for unwieldy paper-based processes, increasing ease of access to accurate, real-time information. This intelligent industrial software solution provides progress tracking, transparency and traceability of activities throughout fabrication for effective supply-chain control.

MODS Connect Fabrication is one of five MODS Connect modules. Intelligent industrial asset management with MODS Connect digitalizes, visualizes and automates essential tasks to improve efficiencies, enhance safety and maximize ROI. All MODS Connect modules feature activity management with interactive scheduling and visible SIMOPS for integrated work front management.

### Functions

- > Intuitive Activity grid interface
- > Excel import/export
- > Auto QR generation and printing
- > Digital forms eliminate paper-based Quality Assurance workstream
- > Automatic creation of fabrication dossiers
- > User roles permissions
- > Dashboard and static reporting
- > Amenable to query for traceability, scheduling and remote oversight
- > Customizable Progress Tracking
- > Document storage and revision control
- > Advanced planning tools and resources (e.g. Gantt charts)
- > Full business integration via web and mobile apps
- > Link to visualization platform

### Benefits

- > Transparent, accurate reporting
- > Reduced administration
- > Fewer business disruptions
- > Enforced regulatory compliance
- > Increased productivity levels
- > Dependable quality of work
- > Improved project ROI
- > Reinforced on-time schedules
