mods CONNECT

WORKPACK

MODS Connect WorkPack replaces paper-based work packs for more intelligent, transparent and accountable project delivery through an accessible, easy-to-navigate cloud-based platform.

Delivering a real-time view of tasks from planning to sign-off, MODS Connect WorkPack links all project information such as engineering, manning, materials, inventory, fabrication, installation, industrial health and safety, scheduling and estimated time for constraint-free project execution. This intelligent digital work pack system ensures signoffs, permissions, copies and departmental access can all be achieved instantly.

MODS Connect WorkPack is one of five MODS Connect modules. Intelligent industrial asset management with MODS Connect digitalizes, visualizes and automates essential tasks to improve efficiencies, enhance safety and maximize ROI. All MODS Connect modules feature activity management with interactive scheduling and visible SIMOPS for integrated work front management.

Functions

> Comprehensive work pack planning and execution
> Cloud-based working, ideal for offshore projects
> Field or project development planning
> Engineering activities coordination
> Construction Management
> Work pack planning, creation and compilation
> Detailed work scopes and drawings
> Job-card creation with materials, equipment and resources

> Work pack, construction, equipment and crew scheduling and planning
> Easy review, control and updates
> Covers all work pack activity phases
> Track execution progress by construction activity
> Access work pack deliverables and record progress on site
> Visualize work pack progress by construction activities or tag
> Closeout notifications and immediate access to work pack

Benefits

> Reduce administrative burden
> Structure work on three levels: work pack, job card and activities
> Interactive & paperless processes
> Flexible system for allocation of work
> Web-based review and revisions
> Compatibility with all MODS Connect modules
> Automatic revision archive
> Work pack readiness trackers
> Handheld technology for agile working
> Planning and execution progress reporting
